

fresh PERSPECTIVES

X-BARZ™

Version 1.0 e-barcode printing solutions for Microsoft® Windows® applications

Add barcodes using ActiveX®, .NET controls

X-BARZ software from Unibar lets you add 1D and 2D barcodes to Microsoft Windows applications, using the capabilities of ActiveX and Microsoft .NET controls.

With X-BARZ, you can easily produce high-quality barcoded invoices, packing slips, pick lists, labels, purchase orders and many other documents as well as Web pages. X-BARZ does not require special fonts, bit-mapped graphics or special printer hardware.

Designed for end users and developers, X-BARZ is easily incorporated into off-the-shelf and custom Windows applications. X-BARZ includes an ActiveX control, to use in native Windows environments, and a .NET managed control, to use in .NET environments.

X-BARZ is Exceptionally Easy to Use

Unlike other products, X-BARZ provides a very simple user interface that is easy to understand and operate. No barcode expertise or programming is necessary. X-BARZ provides the versatility you need without the usual operational complexity.

Versions

X-BARZ ActiveX Control, Developer version 1.0. Includes one developer license and royalty-free distribution of as many as 10,000 runtime copies. .NET compatible.

X-BARZ .NET Control, Developer version 1.0. Supports PNG, JPG and GIF output, copying to the clipboard. Provides managed .NET control. Includes one developer license and royalty-free distribution of up to 10,000 runtime copies. Also includes X-BARZ ActiveX Control, Developer version 1.0.

X-BARZ ActiveX Control, Single-user version 1.0. Includes one PC user license. .NET compatible.

Features

Works with Standard, Custom and Web Applications

X-BARZ can be used with any Microsoft applications that support ActiveX controls, including Access, Word, Excel and others. In addition, X-BARZ can be used in creating custom Windows applications with Visual Basic, C++ and other developer tools.

X-BARZ also makes it simple to add barcodes to Web documents and is fully compatible with Internet Explorer. The X-BARZ control can easily be used with CGI, ASP and other Web scripting languages.

Creates 1D and 2D Barcodes

X-BARZ lets you produce a wide variety of barcode symbologies, among which are Code 39, Extended 3 of 9, Codabar, Code 128, UCC-EAN 128, USS-128, Interleaved 2 of 5, EAN-8, Plessey, Postnet, UPC 2, UPC 5, UPC-A, UPC-E, UPC Version D and EAN-13, and optional PDF417 (2D).

With X-BARZ, you have complete control over such barcode parameters as height, width, rotation, etc.

Supports Data Binding

It's easy to produce reports and labels with barcodes using databases that support ActiveX controls. With X-BARZ, you bind fields in a database to the control and automatically generate barcodes for each record.

Produces High-Quality, High-speed Graphic Output

X-BARZ produces the highest quality output at any size, even with high-resolution printers, without requiring extra fonts. X-BARZ works by creating Windows metafile ("vector") graphics (WMF). These are scalable and device-independent, and are compatible with all Microsoft applications.

For output on Web servers, X-BARZ also creates PNG-format graphics. And for added versatility, the X-BARZ .NET control can also provide barcodes in JPG and GIF formats.
