Unibar® ELS Director™

Create advanced label printing workflows

ELS Director™ empowers you to create custom label processes without *any* modification to your enterprise system. It's all about *you!*

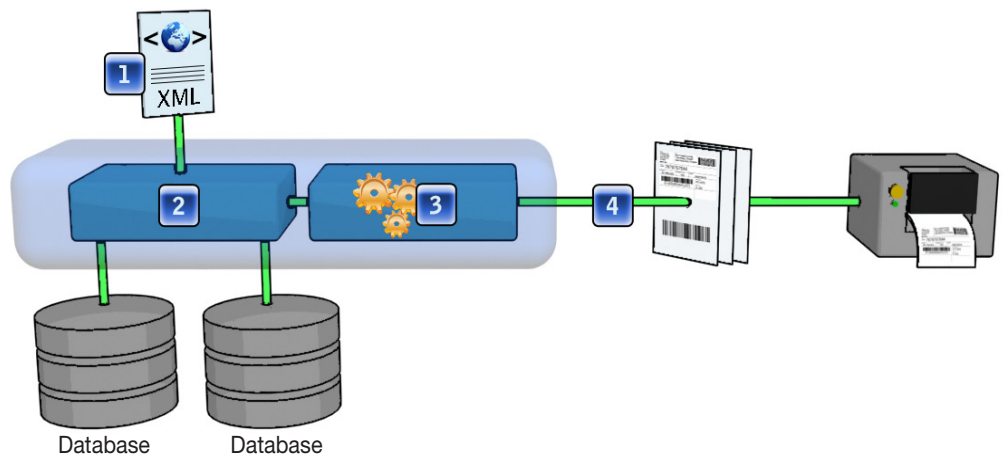

Print the data *you* need, in the label format *you* require, on the printer *you* want, following the workflow *you* dictate. Take control of your complex label requirements with ELS Director. Whether you need to satisfy the label demands of your customers or implement an innovative process, you want a powerful, flexible, easy-to-use tool to free you from the constraints of pre-determined label formats and workflows. ELS Director lets you make the rules!

Features

- **Format choice** – Automate label format selection based on your workflow and your data
- **Data liberation** – Pull data from Oracle EBS and other databases
- **Workflow control** – Create conditional logic to control label routing and content rules
- **OS flexibility** – Supported on Unix, Linux, and Windows platforms
- **Change validation** – Test label process changes without printing the label
- **Access freedom** – Web user interface allows access from your browser

Functionality Example

1. *Intercept the label request.*
2. *Select your data from databases.*
3. *Apply your conditional logic and rules.*
4. *Send the modified label request.*

Why It Matters

ELS Director puts *you* in control of the action with flexible, easily-integrated label printing throughout your supply chain for **higher customer satisfaction, easier label compliance, and lower costs.**
